MAKERERE UNIVERSITY BUSINESS SCHOOL

TAKE HOME EXERCISE FOR THE DEGREE OF BACHELOR OF BUSINESS STATISITCS OF MAKERERE UNIVERSITY ACADEMIC YEAR 2024/2025 SEMESTER ONE

COURSE NAME: SAMPLING THEORY

YEAR OF STUDY: TWO

COURSE CODE: BBM2102

DATE: 23RD AUGUST 2024

INSTRUCTIONS

1. Submit this individually in the next two weeks (11th September 2024)

2. Your answers should not exceed five pages

3. Either handwritten or typed work is accepted

Qn1: With clear examples, differentiate between sampling errors and non-sampling errors.

Qn2: Discuss at least five examples of non-sampling errors.

Qn3: Explain the situations where cluster sampling is most appropriately used.

Qn4: State and explain the properties of a good estimator.

Qn5: Differentiate between baseline, endline, and follow-up surveys in project implementation, and explain how they complement each other.

Qn6: Access the Uganda Bureau of Statistics website. Identify at least two surveys that have been conducted. For each survey, summarize the objectives, survey design, sampling methodology, and sample size used.
