PROGRAMME : MASTER OF SCIENCE IN BANKING & INVESTMENT MANAGEMENT

COURSE NAME : DEVELOPMENTS IN MONEY & BANKING

ACADEMIC YEAR: 2024/25

YEAR : ONE

SEMESTER : ONE

Instructions:

- **ISSUE DATE** : FRIDAY, NOVEMBER 1 2024
- **COMPLETION DATE** : TUESDAY, NOVEMBER 7 2024
- The assignment will be presented in Class using PowerPoint presentations (To be agreed) and a typed script submitted on the completion date.

QUESTION

Credit analysis and evaluation requires a thorough appraisal to decide whether to extend a loan, based on quantitative and qualitative data provided by the client or collected by the bank. According to the bank's credit policy, a detailed assessment of the borrower's operations and justification for the project requiring funding must be conducted.

Using a hypothetical company project in your assigned sector, develop a case with relevant figures. Apply both qualitative and quantitative analysis techniques to evaluate this company, progressing through the various decision-making stages. Conclude with your lending decision and outline strategies to mitigate any anticipated risks.
