INSTRUCTIONS

- Answer all three questions.
- The submission deadline is 12pm on 19th September 2025.
- Use the PEEL structure (Point, Evidence, Explanation, Link) for each main paragraph.
- The coursework should be typed and well-presented.
- The maximum word count for each question is 250 words
- The answer for each question should begin on a new page
- Wherever possible, draw on your own observations, experiences, community examples, or local reports/news sources.

Q1

Leisure activities bring enjoyment, employment, and community spirit, but they also create pressure on the environment. When we look closely, even seemingly harmless activities can have destructive outcomes.

Required

Choose and clearly state one leisure activity in your community that you have either personally experienced or read about in a local report or news source (e.g., a sports event, amusement park, concert, hotel, or festival).

Identify at least four negative environmental effects of this activity. For each effect, write one PEEL paragraph.

Q2

Climate change is no longer a distant issue; it is already shaping how people experience leisure by disrupting the way facilities operate and the safety of those who use them. Communities that rely on leisure and tourism are especially vulnerable to these changes.

Required

Identify at least four negative effects of climate change on leisure activities in your community or country. For each effect, write one PEEL paragraph.

Q3

Leisure facilities such as hotels, parks, sports grounds, or event venues depend heavily on natural resources such as water, energy, and land. How these resources are managed not only affects the environment but also determines the quality of the leisure experience. Responsible management can create long-term benefits for businesses, communities, and ecosystems.

Required

Identify at least four benefits of proper natural resource management in leisure facilities you know. For each benefit, write one PEEL paragraph.
