

BUSINESS RESEARCH SKILLS

BLEH2

- ▶ A systematic and purposeful investigation
- ▶ Involves collecting, analyzing, and interpreting data
- ▶ Aims to generate knowledge and inform decisions
- ▶ Seeks to answer specific questions or solve problems

WHAT IS RESEARCH?

- ▶ To support decision-making
- ▶ To solve practical problems
- ▶ To generate new knowledge
- ▶ To reduce uncertainty
- ▶ To identify opportunities

WHY DO WE DO RESEARCH?

Research as science

- ▶ Uses systematic procedures
- ▶ Collects and analyzes data logically
- ▶ Tests relationships between variables

Research as art

- ▶ Requires creativity
- ▶ Requires interpretation
- ▶ Involves human judgment

RESEARCH AS BOTH SCIENCE AND ART

- ▶ Identify a problem
- ▶ Formulate a topic
- ▶ Develop research questions/hypotheses
- ▶ Define variables
- ▶ Collect data
- ▶ Analyze data
- ▶ Draw conclusions

THE RESEARCH PROCESS (OVERVIEW)

A decorative graphic consisting of several parallel white lines of varying lengths, slanted upwards from left to right, located in the bottom right corner of the slide.

Research can be classified based on:

- ▶ Purpose
- ▶ Application
- ▶ Method
- ▶ Time
- ▶ Nature of data

We will now examine the major types.

TYPES OF RESEARCH (OVERVIEW)

Descriptive research

- ▶ Describes what exists
- ▶ Surveys, observations
- ▶ Example: What is the level of customer satisfaction in city hotels?

Analytical research

- ▶ Explains why something happens
- ▶ Examines relationships
- ▶ Example: Why does service quality influence customer loyalty?

DESCRIPTIVE VS ANALYTICAL RESEARCH

Applied research

- ▶ Solves practical problems
- ▶ Example: How can a restaurant reduce food waste?

Fundamental (Basic) research

- ▶ Expands theoretical knowledge
- ▶ Example: Understanding consumer behavior theory

APPLIED VS FUNDAMENTAL RESEARCH

Quantitative

- ▶ Numerical data
- ▶ Surveys, statistics
- ▶ Objective measurement

Qualitative

- ▶ Words, opinions, experiences
- ▶ Interviews, observations
- ▶ Subjective interpretation

QUANTITATIVE VS QUALITATIVE RESEARCH

Conceptual

- ▶ Based on theories and ideas
- ▶ No direct data collection

Empirical

- ▶ Based on real-world data
- ▶ Observations and measurement

CONCEPTUAL VS EMPIRICAL RESEARCH

- ▶ Purposiveness
- ▶ Rigor
- ▶ Replicability
- ▶ Precision
- ▶ Objectivity
- ▶ Generalizability
- ▶ Parsimony

HALLMARKS OF SCIENTIFIC RESEARCH

- ▶ Clear research problem
- ▶ Appropriate research design
- ▶ Valid measurement tools
- ▶ Logical conclusions
- ▶ Transparent methods

WHAT MAKES RESEARCH RIGOROUS?

A decorative graphic consisting of several parallel white lines of varying lengths, slanted upwards from left to right, located in the bottom right corner of the slide.

- ▶ Honesty
- ▶ Objectivity
- ▶ Integrity
- ▶ Confidentiality
- ▶ Respect for intellectual property
- ▶ Responsible publication

RESEARCH ETHICS

In hospitality & events:

- ▶ Protect guest data
- ▶ Avoid falsifying customer responses
- ▶ Respect respondents
- ▶ Ensure informed consent

WHY ETHICS MATTER IN HOSPITALITY RESEARCH

- ▶ Analytical ability
- ▶ Numeracy skills
- ▶ Communication skills
- ▶ Organization
- ▶ Teamwork
- ▶ Curiosity

QUALITIES OF A GOOD RESEARCHER

- ▶ Improves service quality
- ▶ Enhances customer satisfaction
- ▶ Supports policy decisions
- ▶ Identifies industry trends
- ▶ Creates competitive advantage

IMPORTANCE OF RESEARCH IN YOUR FIELD

END WEEK 1
